

## Results of Analysis

- Residents served by new PSA:
  - South Gate 23,680
  - La Mirada 4,123
- No. of people served by PSAs within 4 km of proposed sites fall:
  - South Gate 12.1%
  - La Mirada 3.9%
- No. of households served by PSAs within 4 km of proposed sites fall:
  - South Gate 17.0%
  - La Mirada 5.6%
- No. of children served per park hectare drops:
  - South Gate 11.7%
  - La Mirada 4.8%
- **Summary: South Gate site impact > La Mirada site**

## Next Steps: Phase 3 GVP Tools

- Linked to IRWM efforts
- Predict suitability of sites for infiltration and local habitat linkages
- Identify sites needing water quality improvements
- Integrate storm drain and stream network datasets
- Target areas for ecosystem management and restoration

## Final Thoughts

- Be careful what you wish for in life!
- Need to view environment as a whole
  - Watershed function, habitat protection & restoration, parks & recreation, human health
- GIS and models afford valuable tools
  - Collect and disseminate scientific knowledge
  - Identify and evaluate management options
- Need to build solutions from the bottom up
  - Our goal this week should be to learn about one new tool, meet one new colleague, collaborator, etc.
